“ZZW-115: NURP1 Inhibitor for Pancreatic Adenocarcinoma Treatment”

Patricia Santofimia, PhD
Scientist, Pancreatic Cancer Team, Cancer Research Center of Marseille, France

Objectives:

- Targeting stress response proteins, as NUPR1, can be a promising therapy for treating cancer
- Designing and re-purposing drugs is a good strategy to select compounds with anticancer activity
- ZZW-115 is a promising therapeutic agent inducing tumor cell death by necroptosis and apoptosis

THANK YOU TO OUR SPONSORS:
