“Quantitative Imaging Biomarkers for Outcome Prediction in Lung Cancer”

Dr. Sarah Mattonen, PhD
Assistant Professor, Department of Medical Biophysics and Oncology, Western University; New Scientist-Lawson Health Research Institute

Objectives:
- To describe the process of radiomics and how it can be used for decision support in oncology.
- To describe a tumour radiomics model on PET imaging for outcome prediction in lung cancer.
- To describe how integrating clinical, tumour, and non-tumour radiomics impact model performance.
