"Improving the quality of radiation treatment: from dissemination to implementation."

Dr. Erin Gillespie, MD.
Assistant Attending, Department of Radiation Oncology.
Member, Center for Health Policy and Outcomes.
Memorial Sloan Kettering Center (New York).

Objectives:
- Understanding the meaning of a volume-outcome relationship in radiation oncology and its potential impact on radiation treatment quality.
- Define dissemination and implementation science.
- Identify and describe implementation strategies and common methodologies to evaluate their efficacy.
