“Influenza Vaccine Effectiveness in Cancer Patients: Lessons to be learned during a COVID-19 pandemic.”

Dr. Phillip Blanchette, MSc, MD, FRCPC
Medical Oncologist, London Regional Cancer Program
Assistant Professor, Department of Oncology, Western University
Scientist, Lawson Research Institute

Objectives:

- Describe the current recommendations for influenza vaccination in cancer patients
- Outline the evidence supporting influenza vaccine effectiveness
- Describe barriers to influenza vaccination for our patients and opportunities for quality improvement
- What can we learn from influenza vaccination effectiveness in terms of COVID-19 pandemic
