

## **Objectives for Ortho-Hybrid Rotation**

At the end of the rotation, the Resident will:

1. Improve physical examination skills for MSK injuries and be able to perform a focused but complete joint exam appropriate for the ED
2. Learn how to recognize and manage common MSK injuries including ED management and appropriate follow up
3. Learn how to diagnose and manage concussions, including discharge instructions, appropriate referrals, and return to play guidelines
4. Familiarize themselves with the doping issues in sport, and the resources available for drug prescription in competitive athletes
5. Familiarize themselves with diagnosis and ED management of non-traumatic joint pain, specifically osteoarthritis of the major weight bearing joints.
6. Learn to interpret ED MSK radiographs
7. Develop skill in fracture management including recognition, reduction, casting and disposition
8. Develop skill in joint dislocation including recognition, reduction, post reduction management, and disposition
