Acquires clinical examination and assessment skills.  Acquires clinical examination and assessment skills.  Acquires clinical examination and develop appropriate differential diagnosis and management plans.  MEDICAL EXPERT — evaluate at expected PGY level  Not Applicable  Not Applicable  DoesNot Meet Expectations  Background physiology/medical knowledge  Demonstrates an understanding of normal physiology and the alterations which may impact actuely ill children requiring intensive/critical care.  B. Pediatric Critical Care knowledge  Demonstrates an knowledge and understanding of pediatric-specific critical care issues  E. History and Physical Examination Skills  Takes a history with the appropriate level of detail for the situation. Performs a physical examination that is focused, efficient, organized, and demonstrates recognition of key indicators of acuity.  Integration and Application Selects and sequences appropriate investigations. Interprets results, and synthesizes information to arrive at a diagnosis.  Clinical Uponement and critical thinking  Recognizes and prioritizes management of airway, breathing, and circulation.  Considers broad differential diagnoses and systematically rules likely issues in or out. Is able to problem-solve independently, while recognizing personal limitations and calling for help appropriately.  Performance in Emergencies  Quickly assesses the need for emergent intervention in the acute care setting.  Recognizes acutely ill patients and institutes emergency management appropriately for the level of training and skill. Consults promptly and appropriately.		_		_	-		_
