Physiology and Pharmacology,
Western University

Thursday February 23, 2017
12:00 – 1:00 pm
Auditorium B, University Hospital

Light refreshments provided

Everyone is Welcome

“Non-communicable diseases (NCDs), a legacy of an adverse in utero environment?”

Objectives:

1. Participants will become acquainted with the origins and impact of non-communicable disease (NCDs).
2. Attendees will gain a basic understanding of how poor in utero environments impact fetal physiology and negatively program later life metabolism.
3. Participants will learn about how chronic metabolic diseases, or NCDs, may be programmed early in utero with life long consequences.
