

Anatomical Pathology Residency Program

RESIDENT FROZEN SECTION COVERAGE

Residents are responsible for frozen section coverage at UH and Vic campuses.

There are however, occasions when complete coverage is difficult to facilitate due to off-service rotations, vacations, leave, etc. In light of these high demand situations:

1. Residents will be scheduled at Vic campus a maximum of 2 times per 3 weeks. This will ensure that residents will be off-site a maximum of 3 days per 4 week rotation.
2. Residents on a research block will still be scheduled for frozen sections.
3. Vacation/leave requests will require complete coverage (i.e. 4 days per week) on any given week. Special consideration will be given to absences during national meetings, research day, etc.
