

PATHOLOGY AND LABORATORY MEDICINE
PATERSON LECTURE

Lewis C. Cantley, PhD

Margaret and Herman Sokol Professor
Director of the Sandra and Edward Meyer Cancer Center
Weill Cornell Medical College

“New approaches for improving targeted cancer therapies”

Thursday, December 2, 2021

12:00 p.m. - 1:00 p.m.

Schulich Webinar

Zoom Link: <https://tinyurl.com/y5pdcddj>

Dr. Cantley has made significant advances in cancer research, stemming from his **discovery of the signaling pathway phosphoinositide 3-kinase (PI3K)** in 1984. His pioneering research has resulted in revolutionary treatments for cancer, diabetes and autoimmune diseases. Please register to participate in a sure-to-be captivating Paterson Lecture.
