

WORKING TOGETHER FOR A SAFER CAMPUS COMMUNITY

LAB SAFETY PRACTICES

Stay home if you're sick.

Practice physical distancing when possible, 2 meters apart (6 feet).

Wash your hands with soap and water and/or use hand sanitizer when entering the lab and throughout the day.

Wear a surgical mask/face covering at all times.

Cough and sneeze into your elbow.

Avoid sharing tools when possible.
If not, disinfect before and after each use.

Clean and disinfect frequently used tools, equipment and surfaces on a regular basis (clean in, clean out).

Use proper personal protective equipment (PPE) when cleaning and disinfecting (gloves and safety glasses).
