

2nd Annual Western Organoid Workshop (W.O.W.)
8:30 AM – 4:30 PM
November 2nd, 2023

Call for Abstracts

We are excited to announce the date for our 2nd Annual Western Organoid Workshop (W.O.W.), which will take place from 8:30 to 4:30 in the McKellar room, 2nd floor of the UCC. This year, we have Dr. James Wells, from the Cincinnati Children's Hospital Medical Center giving a talk about his research in organoids. Dr. Wells is a well-respected researcher who focuses on the embryonic development of endocrine cells, including pancreatic beta cells and tissues of the gastrointestinal tract.

Similar to last year, there will be talks from Faculty and trainees and we will now have a poster session during and following lunch at the Wave restaurant. Below is the abstract submission form. Please submit to Danielle Porplycia: danielle.porplycia@lhsc.on.ca by midnight **October 20, 2023**, so we can determine which trainees will present. We will choose two abstracts for talks during the day – one in cancer biology and one in developmental biology.

Registration for W.O.W. will be open on September 15th, 2023. By this time, we will have a complete list of talks (expected to be four Faculty talks) minus trainee talks. Registration will once again be free to all participants.

We look forward to another exciting day of organoid-based research and hope to see you all there!

Executive committee for the Interdisciplinary Initiative in Organoid Research.

**ABSTRACT SUBMISSION FORM: 2ND ANNUAL WESTERN ORGANOID WORKSHOP
(NOVEMBER 2ND, 2023)**

(Please submit to Danielle Porplycia: danielle.porplycia@lhsc.on.ca by **midnight October 20th, 2023**)
