Course description
This course is designed to give students a basic understanding of the molecular pharmacology and therapeutic properties of anticancer agents. The focus is on molecular mechanisms of cancer chemotherapy, and will include drug resistance and the roles of receptor kinases and G protein-coupled receptors in existing and novel cancer therapies.

Required:

- Stable internet connection
- Laptop or computer
- Working microphone
- Working webcam

Delivery mode:
This course will be delivered completely online. Virtual sessions will have a combination of synchronous (live) and asynchronous (recorded) delivery. Students could be expected to complete work prior to attending sessions. Timetabled sessions could be used for lectures, tutorials, discussions, groupwork, etc. Below are details about the sessions.

<table>
<thead>
