

Visiting Professor

Dr. James Bain is Professor and Chair of the Division of Plastic Surgery at McMaster University in Hamilton. He completed his undergraduate degree and medical school at the University of Western Ontario before his training in Plastic Surgery at the University of Toronto. During his residency, he completed his MSc in the lab of Susan Mackinnon including seminal work on the use of peripheral nerve allografts. His clinical interests include Hand, Peripheral Nerve & Microsurgery as well as Paediatric Hand and Peripheral Nerve surgery. His research interests have continued in peripheral nerve, particularly strategies to protect denervated muscle from irreversible atrophy.

The Division of Plastic
& Reconstructive Surgery
